BRÜCKNER presents the latest carpet technology on CHINAFLOOR 2009 in Shanghai

Leonberg/Germany. For decades the family-run company BRÜCKNER with domicile and production site in Germany has been specialized with great success on tailor-made carpet finishing and coating lines. Like in the past years, the internationally active company will participate in the DOMOTEX/CHINAFLOOR fair in March in Shanghai. Our experts are looking forward to meeting you in hall W1, Stand 1 H10.

BRÜCKNER's carpet specialists have decades of experience and competence for the planning and manufacturing of your individual solution. The comprehensive range of products includes not only complete line concepts but also individual units. This includes among other products flow-through dryers for tufting carpets, needle felt carpet finishing and coating lines, carpet back coating lines, finishing lines for artificial turf and non-slip underlays for carpets as well as woven carpet lines. The robust design of the easy-to-maintain lines ensures a long service life.

Energy efficiency and productivity of the lines gets more and more important in the international competition. BRÜCKNER's experienced technologists and engineers offer therefore lines with a guaranteed high dryer output and a simultaneously low energy consumption.

PRESSEMITTEILUNG

Pic. 1 BRÜCKNER finishing line for grass carpets with integrated DUO-THERM dryer

The DUO-THERM dryer has been developed on the basis of long years of experience in drying technology. It is the perfect solution for all thermal treatment processes requiring a differentiation between upper and lower air temperature. It is therefore mainly used in textile and carpet coating lines. Its features are above all a perfect temperature accuracy, low energy consumption and minimum maintenance.

Pic. 2 BRÜCKNER carpet finishing line with SUPRA-FLOR carpet dryer

The SUPRA-FLOR carpet dryer, which is designed with a support belt unit, functions according to the flow-through principle. The permeable support belt across the complete dryer length and width prevents a slagging of the fabric web between the support rollers. This ensures also a distortion-free fabric transport through the complete dryer.

As internationally acting company, BRÜCKNER is in the position to erect and commission modular tailor-made lines within very short time and to provide optimal technical support by BRÜCKNER experts throughout the service life of the line. Due to the long years of experience with such projects, BRÜCKNER has many references among well-known carpet producers.
