News

2008 - second quarter

General news

It has now been a year since three long-time managers of Eltex purchased the Eltex global group of companies. To strengthen the group and better position ourselves in the markets in which we operate, many improvements, both internal and external, have been made. Perhaps you have read the news of previous improvements and you can read of our latest improvements in this edition of Eltex News. In fact, starting Eltex News is one improvement we have made in order to better communicate with all of our contacts.

In all of our plans the main objective is to better serve our customers through improved support and innovation.

The Eltex group consists of:

Eltex of Sweden AB (Main R&D, Global Sales)
Eltex Manufacturing Ltd., Ireland
(Manufacturing Headquarters)
Eltex U.S., Inc. (Sales & Service for North America)

The owners are:

Brian Hicks, Managing Director Eltex of Sweden AB, Sweden
Seamus O'Dwyer, Managing Director Eltex Manufacturing Ltd, Ireland
Jonathan Bell, President Eltex U.S., Inc., USA

Our new premises in Osby

[Summer holiday schedules](#) for
Eltex of Sweden AB
Eltex Manufacturing Ltd

To improve our service to, and cooperation with, our representatives world wide, we have engaged Mr. Daniel Sauret from Spain. Mr. Sauret has worked as an Eltex representative for more than 20 years, through Polsa-Eltex in Barcelona. He has helped us to develop some of the products we today sell as standard parts. As of April 2008 he is employed by Eltex of Sweden AB.

Daniel Sauret
Zamora, 103 – entlo 3º
ES-08018 BARCELONA, Spain
Tel: +34 93 309 00 17
Fax: +34 93 309 59 45
Email: daniel.sauret@eltex.se

Mr. Sauret is now the person responsible for keeping our representatives updated on news from us, and also educate them on how to apply our sensors in different applications. This includes visiting them and evaluating the local market together with them.

K-G Pettersson
Sales Manager, Textile Division

Product Spotlight **EYE – Eltex Yarn Expert**

The **EYE** system is two very powerful tools in one, yarn break detection and process monitoring. It's a flexible system enabling it to be applied to many different types of textile machines ranging from a few yarns to thousands, for example, warping creels, winders, heat-set, etc. And, since it's designed to Eltex' ridged quality/performance standards, satisfaction is guaranteed!

The operator terminal provides a central location where all the parameters for the system can be set and the statistics of the process monitored, for example machine efficiency. Since the event logging is generated from each individual yarn, it's possible to pinpoint the weak spots in the process.

The optional **EYE Analyzer** is a PC program that lets you monitor multiple machines from one centralised location. It's a very powerful management tool, giving you real-time information of your whole department.

Measurement Division News

We want to thank all our customers for a good response at the GastroNord exhibition in Stockholm, and look forward to good cooperation in the future.

Rasema Jusic
Sales and Marketing, Measurement Division

Product Spotlight **Mätman Check HACCP**

Eltex introduces a new version of Mätman Check with even more possibilities and functions. The new Mätman Check HACCP gives you reminders of your daily safety checks in the preparation and handling of food. Managers, responsible for overseeing an organisations safety routines, can view the measurements from all the organisations different locations, from their own PC via the network.

The new, illuminated display is easy to read in most light conditions. The new Mätman Check uses thermocouple sensors for faster response and a wider selection of temperature probes.

CombiLab 6.0 release

We are now releasing version 6 of our CombiLab software.

CombiLab is software for supervising, acquiring, analyzing and reporting data and measurements online. It is used widely in power plants to monitor pollution output, but can be used in many other applications.

The most important improvements in this version are compatibility with Windows Vista and the possibility to display data from the report database as a diagram.

Energy Division News

The wise use of energy is a matter that can't be overlooked today. We all must do our part to conserve our natural resources. That's

CombiLab 6

where our energy products can help. Here we are spotlighting one, but you can see the full product line on our web site, [www.eltex.se/power limiters page](http://www.eltex.se/power_limiters_page).

Håkan Löfgren
Sales and Marketing, Energy Division

Product Spotlight **Eltex-vakten – load limiter**

Eltex-vakten is a load limiting device for use in electrical circuits in houses, schools and industry. It limits the maximum power consumption during peak load, enabling you to optimise the energy balance in weak power distribution grids.
